Spring channels in Bellary District - shortage of supplies consequent to construction of Bhairavanathippa Project in Andhra Pradesh.

Mysore Government Secretariat

PWD File No. 15 BRA of 196 [App. F. III 2

PWD 13 BRA

Serial No.

1) Letter No.Ni. dated 23rd May 1962 from the Deputy Commissioner, Bellary.

2) Letter No.GPH 4 AGR/61-62 dated 28-5-1962 from the Chief Engineer (General) of Mysore

3) Representation from Shri R.Bhogesh Patil and others from Bellary Taluk.

4) Representation dated 27-8-1962 from the President, Panchayat Board, Chaganur.

---

1) All the above four references pertain to (a) shortage of water on the Hagari spring channels allegedly on account of construction of Bhairavanathippa Reservoir in the upper reaches and (b) demanding that water should be supplied to these channels from the Tungabhadra Low Level Canal since these areas are commandable therefrom.

2) So far as (a) is concerned (i.e., effect of Bhairavanathippa Project on these spring channels and the rights of these spring channels on the inflows in Bhairavanathippa), the matter is separately being dealt with as an Inter-State issue. It is unlikely to yield any immediate results that can redress grievances, making it imperative to take action regarding (b).

3) (b) the request for supplying water from the low level canal, needs to be considered favourably as a temporary measure just as in the case of Moka, the lower most of these spring channels, provided (a) these areas are commanded by the low level canal and (b) we have not yet utilised our full share of waters on the low level canal. The Irrigation Section dealing with Tungabhadra Project may please put up a draft letter to be addressed to the Secretary, Tungabhadra Board for placing the proposal before the Board, for approval. It might be necessary

Note.—Contn. Sheet

2

File No. PWD 15 BRA of 195-

Serial No.

to indicate therein, the (a) commandable areas with type of crops under each channel, (b) Number of distributory from which water could be fed to each block, Area (c) period of water requirement and (d) extent of water in each period. Information in this regard if required by the Board may have to be supplied by the Chief Engineer (General) and Deputy Commissioner, Bellary, whose letters do not throw much light in this respect.

may also take action to obtain the particulars as at A' of the OSD's note

16/10/62 6) The notes and orders in paras 1-4 above May please be seen.

In this connection it is submitted that addressing the Board without all the particulars referred to at "A" in para 3 is not likely to get quick results. Moreover it is necessary to know the latest and exact figure of actual development under the TBP Low Level Canal in Ballary to find out whether there is scope for the temporary supply as contemplated in the present case. It is therefore for orders whether information on points referred to at A in para 3 above may be obtained from D.C. & C first and then the Board addressed. F or [illegible]

42 Ref. para 35 ante

43 In reply to G.L. dated 11-4-63, the D.C. Comm., Bellary writes to say that Chaganur block is situated below the bed level of the Low Level Canal as verified by the Irrigation Engrs. who are of the opinion that water can be made available to Chaganur block lands from D.P. No. 33 of L.L.C.

44 Put up for perusal w.r.to para 35.

18-5-63

25/5

45 From the Plan received from the Deputy Commissioner, Bellary at page 8 c/f, it is clear that the Chaganuru block is situated above the Low Level Canal. However, the D.C. Bellary has made a categorical statement saying that this block is under the command of the LLC and water for the same can be supplied from the D.P.No.33. The case may be referred to the CE/IP for his opinion in the matter.

ii) Letter No. BTS. 2/63 D/20-8-63 from the President, D.C.C. Bellary

(1) P. 67/c

63 From the perusal of letter from the President, D.C.C., Bellary, it will be seen that the supply of water is inadequate to Chaganur Block due to the constn. of BT Project.

(2) P. 61/c

64 O.S.D. has got a file No. PWD. 27 BRA 61 on the same subject. In that file a D.O. has been addressed to the Concerned Minister of Andhra Pradesh about supply of water to Spring channels.

65 In view of this, this file may also be transferred to O.S.D. for orders.

(Mad)

12/9 O.S.D.

12/9

66) These requests from Ayacutdars of Hagari Spring Channels to get water from Tungabhadra Project need not be linked up with the case that my section deals, i.e. in regard to establishing our rights on our spring channels vis-a-vis Bhairavanathippa Project of Andhra Pradesh. That is bound to take time due to a protracted correspondence, discussions and even arbitration of the dispute. ~~There~~ Since such action on such requests has ~~urgentiy~~ urgently to be taken, unnecessary reference

16 PWD 126 GIS 62

PWD 1085 J 6794/MI/63

to my section may please be avoided in all such cases. Instead as soon as such requests are received, immediate action may be taken either to ask Andhra Pradesh to let down water from Bhairavanathippa, or else approach Tungabhadra Board for allowing Tungabhadra waters by debit to Mysore, pending settlement and the dispute with Andhra Pradesh.

There seems to be a multiplicity of files 67 136/050 on the subject which may please be avoided if possible.

D.O. Reminder put up may issue

Pl. put up the extract of minute of S.W. Group

Minutes of the Meeting of the State Working Group for Irrigation Development

73. Please see letter dt. 23.5.62 of the Deputy Commissioner, Bellary, in which he suggested to Govt. that water may be made available for the Hagari Spring Ayacut lands of 6 villages in Bellary District, ~~form~~ from Low level and High Level canal, out of Andhra quota. The Chief Engineer (General) also in his letter dated 28-5-62 made a similar proposal to Govt., Representation were also received by Govt., ~~By~~ from the ryots of the six villages of Rupangudi, Asundi etc.,

74. The matter was proposed to be placed before the T.B. Board. It was however considered necessary to obtain certain information from Chief Engineer (General) on the points specified at p. 24/c. He has since furnisned the same. It was also considered necessary to ~~xx~~ obtain the foll wing information from Deputy Commissioner, Bellary : -

(i) The exact mileage and chainage where the canal

18

126 I s 62

vent exists

(ii) The correct situation of the Chaganur block -

As regards (i) above, the Deputy Commissioner, Bellary has stated in his letter dt. 3.4.63 that the Hoka spring channel ayacut is supplied with water from D.P. No. 33 which is situated at mileage M 74 - F 2 - Ft. 451 of Low level canal. As regards (ii) above, he stated that Chaganur block is situated below the bed level of Low Level canal and that water can be made available to Chagan r block lands from D.P. No. 33 of L.L.C.

75. In para 45 of notes it was directed that the above fact may be referred to C.E., I.P., for his opinion. The matter was accordingly referred to him. His reply is still awaited. He was last reminded by D.O. as from Deputy Secretary to Govt., on 10-10-63. Prior to this he was reminded by a D.O. on 5-9-63 as from Joint Secretary to Govt., Perhaps another D.O. reminder may be issued to C.E., I.P., as from the Secretary.

76. Please see extract of the minute of the meeting of State Working Group for Irrigation Development. In that meeting it was decided that a note should be submitted to Chief Secretary for inclusion of the subject in the Agenda of the Southern Zonal Council meeting. In this connection it is pointed out that, there is a file about 'Hagari Spring Channel lands' in the O.S.D's Section. It has been ascertained that a note has already been put up by O.S.D's section in file No. 27 BRA 60 and the same is being included in the Agenda of the Southern Zonal Council. In this connection G.O.'s memo. dt. 15-10-63 may be issued ✓ 89/c.

77. Draft D.O. to the C.E., I.P., may issue.

being taken up with the Tungabhadra Board. May be referred to the Minor Irrign. section for return with such a note

Sd/-
22/1/64.

91) This was discussed with the Deputy Secretary.

92) The matter on which a decision is necessary just at present is whether, pending consideration of the question by the Southern Zonal Council, the Tungabhadra Board may be approached for making available water, on a temporary basis, from the T.B.P. Low Level Canal, to the lands under the Chagnur Channel. In this connection, the letter of the Chief Engineer at page 91 c.f. may please be perused. In it, the Chief Engineer has stated that any proposal to divert water from the low level canal to the spring channel has to be based on the same principles under which water is being supplied to the Moka Block from the low level canal. The Chief Engineer has also stated that in view of the fact that the Ayacut under the low level canal is rapidly developing and the ayacut of the low level canal does not include the area under the spring channels, it may not be possible to supply water to the spring channels from the low levelcanal without detriment to the Ayacut under the low level canal. Even if we take up the matter with the Board, the decision of the Board would perhaps be to the effect that

92) Supt.
24/1/64

WD-010154-GPB-PZS-8,00,000-1-10-61

Serial No.

the supply of water to the lands under Chagnur Channel will be out of the Mysore Share of waters under the low level canal, as ~~as~~ in the case of lands of Moka village. Therefore a ~~xxxxx~~ proportionate extent of ayacut under the Low Level Canal in the Mysore area will be deprived of irrigation facilities as ~~if~~ a consequence of the supply of water from the low level canal to the Chagnur Channel. It is therefore for orders whether the Board should be addressed in the matter or whether ~~we~~ may await a decision ~~on the basis of the discussion~~ at the Southern Zonal Council or the proposed Conference at Ministerial level.

93) For Orders. Ref. para 87.

94) k

129 In G.L. dated 7-4-64 the Secy. to the Tungabhadra Board was requested to include in the ~~next~~ agenda of next meeting of the T.B.Board the issue relating to supply of water as a temporary measure to Chagnur channel from TB Low level canal.

123 In accordance with this Govt. letter, the Chairman, Tungabhadra Board in OM No.2712/B1/66-1 dated 20-5-1964 is pleased to accord sanction to the supply of water to the Chagnur channel from Tungabhadra Project, Low Level Channel during 1964-65 subject to the condition that water so let down would be treated as out of the quota of the waters of the Govt. of Mysore available for irrigation under the L.L.Canal scheme. The CE, (2-13) Tungabhadra Board is further directed by the Board to let down water from the Low Level Canal to the Chagnur channel at the request of the concerned officers of the Govt. of Mysore.

P 113-114 C

124 In this connection please see the letter dated 7-5-1964 from the CE, Irrigation Project, Bangalore. The Tyacutdars of Chagnur Block are reported to have represented that they are prepared to construct the channel from DP No.34 of LLC to their village at their own cost. The cost on this account is estimated to be Rs. 33,000/-. The CE, IP requests orders of Govt. to allow them to construct the channel at their own cost and also to feed the area with the express understanding that the permission to utilise the waters of LLC is given purely on a temporary basis subject to availability of waters and that this temporary permission would be withdrawn at any time and that

Secretary P.W.D)

Chagmur block was being fed by Hagari Spring channels which have dried up after the construction of Bhairavanthippa Reservoir in Andhra Pradesh territory by that State, thereby affecting the prescriptive right of our State. This question has been taken up with the Andhra Pradesh Government through the Southern Zonal Council. A permanent solution of the problem facing the cultivators of this area will have to await a decision by the Zonal Council. 128 PWS.3512.

We have been allowing water from Tungabhadra Reservoir as a temporary measure for irrigation in the areas fed by the spring channels in the past. One of such areas is situated in Moke firka village. The cultivators of the areas under Chagnur channel of Hagari Spring have now represented that they should be permitted to construct at their own cost a channel taking water from the Low Level Canal for Irrigation in their areas which were being fed by the spring channels in the past. ~~From the ayacut map of the Tungabhadra reservoir, it appears that the Chagnur channel area is situated in the Upper Reaches and therefore it may not apparently~~ 129

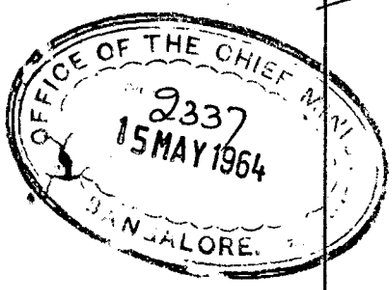
130



The Chief Engineer in his letter at page 45 CF has mentioned that any release of water from the Low Level Canal would adversely affect the area commanded by that canal and that therefore, as a permanent solution, water should be made available to this area from High Level Canal from the Andhra Pradesh share if it is not possible to get supplies from Bhairavanthippa reservoir. As this is a major issue which is pending before the Zonal Council, it would take obviously a long time to arrive at any workable decision. In the meanwhile, as suggested by the Chief Engineer we may allow construction of a small channel from the Low Level Canal at the cost of the beneficiaries purely as a temporary measure without any future right over such useage. The construction of channel will however be under the direction of the Public Works Department (Irrigation branch).

181) The Copy of letter at CF page 148 from the Addl. Secy to Govt of Andhra pradesh public works Dept Hyderabad addressed to the Secretary, Tungabhadra Board may please be seen. In this letter Andhrapradesh Govt. has asked for payment of royalty from mysore Govt. for the waters released for the Hagari and Changanur Channels from Tungabhadra ~~Board~~ Reservoir. In the Connection Andhra Govt. Required particulars regarding Area brought under irrigation, total Revenue Collected etc.. This information furnished by CE(G) is at CF pages 179-189 with reference to Govt letter at CF page 149/a. This file had been taken by the Major Irrigation Section on 29/10/65 for want of TB Board meetings are returned on 2/6/66.

182) The subject dealt with in this file being an interstate matter may be

183 yes | deal with in Spl. Irrigation Section. For

D.S. 18/6 U.S(T) may please study and put up note on the subject in view of CE(IP)'s Letter dated 31-1-1966 at Page 184/C/c. 8/6/66.

Please submit to U/S(T)

Sr 22/6/66

185) Kindly refer the letter No.4553 II/64-2 dated 17th August 1964 from the Additional Secretary to Government of Andhra Pradesh addressed to the Secretary, T.B. Board at Page 148/c.f. In this letter it has been argued by the Secretary, Andhra Pradesh that they would supply of the waters to the Chagnur Channels (Hagari Spring Channels) should be treated at par with the supply of water from Tungabhadra Dam to Krishna Delta for raising second crop. It has been therefore opined by him that the Govt.of Mysore should pay royalty to the Board for waters released for utilisation under these Hagari Spring Channels. He has also asked for details relating to the area brought under Irrigation, Water Rates charged and total revenue collected in respect of these Channels from the year 1956 onwards. This subject was taken up in the Third Meeting (1964.65) of the Tungabhadra Board. Please see at Page 155/c.f. It is seen that the subject has been deferred for consideration in the next Meeting. Since then, this issue has not come up for discussion and is being deferred from Meeting to Meeting.

186) Please see a detailed note on the claims of Andhra Pradesh at Pages 152-154/c.f. Please also see the letter of the Chief Engineer, I.P. dated

P.t.o.

31-1-1966 at Page 184/c.f.

187) The Hagari Spring Channels are not receiving water due to the construction of the Bhairavanathippa Reservoir, by Andhra Pradesh ~~of~~ Hagari in their State and thereby cutting off all supplies in to the river below ~~the~~ Reservoir. The Hagari Spring Channels Moka, Chaganur etc., are situated below the Bhairavanathippa Reservoir and are in the Mysore State. Owing to the construction of Bhairavanathippa Reservoir, these spring channels have been denied their ~~supply~~ supply. This question of Bhairavanathippa Reservoir providing for releases required to meet the demand in the Hagari Spring Channels which existed before the construction of the Bhairavanathippa Reservoir has been taken up in the Southern Zonal Council and it is seen that it was agreed in that Council that this issue would be solved by mutual discussion between the two Chief Ministers. As a preliminary to the Chief Minister's Meeting, Officers Meeting at Chief Secretary level is proposed to be held on 6th and 7th July 1966. This issue is one among the many subjects proposed for discussion in that Meeting.

188 Next, as regards the contention of Andhra Pradesh that the supply of water to the Hagari Spring Channel be treated at par with supply of waters to second crop in Krishna Delta. ~~is not correct~~. The Hagari Spring Channels are drawing water from L.L.C. out of the share of the Mysore under L.L.C. The Krishna Delta is not at all connected with Tungabhadra and therefore cannot be equated with the Hagari Spring Channel Ayacut which is atleast a contiguous area with Tungabhadra Ayacut. As such the question of furnishing any details of area irrigated, water rates charged, etc., to Andhra Pradesh or to

PWD 13 BRA 66

Tungabhadra Board does not arise at all. The statement showing the area irrigated water rate charged and amount collected so far under the Moka and Chaganur Spring Channels may please be seen at Pages 187-188 c.f.

	of their wet lands with the help of the Tungabhadra Project Low Level Canal.	
	The position in regard to the cultivation of the Moka lands with the help of spring channels prior to the construction of Bhairavathippa project in Raidurg Taluk of Andhra Pradesh State and its effect have been explained in paras 185 to 188 ante. The lands in the Moka village were being irrigated with the help of what were known as spring channels emanating from Hagari river. But after the construction of the Bhairavathippa Project in Andhra Pradesh State these spring channels have almost dried up affecting the riparian rights of the villages of Moka and Chaganur lands. As a matter of fact, the Andhra Pradesh Government in their report submitted to the K.G. Commission had made a reference ~~that~~ to the Bhairavathippa project meeting the needs of the irrigation lands in these two villages. But unfortunately, our representations with the Andhra Pradesh Govt. for releasing sufficient water from Bhairavathippa Project for these lands have not met with any success. This is one of the subjects proposed to be discussed in the Inter-State conference. If the Andhra Pradesh Government do not agree to release water from Bhairavathippa Project to meet the riparian rights of the lands lower below, then we will have to insist upon a part of the water (released)	(220)

WD 01050—GPB—8,00,000 18-12-65

238) Kindly peruse the letter from the Divisional Commissioner, Gulbarga, placed below.

239) (a) Six Spring Channels take off from the Hagari River and have an Ayacut about 1,500 Acres under them. Since the construction of Bhairavani Thippa Reservoir across Hagari River in Andhra Pradesh area, the flows in the Hagari River have been completely cut off. The Ayacut under the Moka and Chaganuru Spring Channels is at present being fed with waters from the Tungabhadra Low-Level Canal out of share of Mysore State. The other four Spring Channels, Viz., Asundi, Talamamudi, Kuntanahall and Roopangudi lie below the Tungabhadra H.L.C. All these six Spring Channels should rightly have been fed from waters released into the River from the Bhairavani Thippa Reservoir in Andhra Pradesh. There has been correspondence in this regard with Andhra Pradesh and as per the latest orders of the Chief Minister, a D.O. letter addressed to the Chief Minister of Andhra Pradesh pointing out the need of feeding the Hagari Spring Channels from waters of Bhairavani Thippa Reservoir has been put up for approval in File No. PWD 13 BRA 66 placed below. That Draft after approval will be issued and the reaction of Andhra Pradesh awaited.

240) (a) In the present letter from the Divisional Commissioner Gulbarga, it is seen that certain Ryots rights under the Hagari Spring Channels coming under the command of the H.L.C. have planted paddy in more than thousand acres based on the waters that were let down from the H.L.C. through an Escape into the Hagari River temporarily for sometime. Details as to why and how much of water was let down from the Tungabhadra H.L.C. into the Hagari River are not known. Since this letting down of water into Hagari River was temporary, it is stated that the crops have begun to wither away immediately after the

p.t.o.

61

Subject: MD 13 BRAB Bdy I File No. M. G. S.

closing of the Escape from the H.L.C. The Divisional-Commissioner therefore desires that the water is immediately let down into Hagari River to save the paddy crop, which might result a loss of more than 20 lakhs to the ryots. He has therefore suggested that action may be taken to approach the Tungabhadra Board to release water from the H.L.C. out of Mysore Share of waters to feed the area under the Hagari Spring Channels, where paddy crops have been sown.

41) Since the Ayacut under the Hagari Spring Channels does not actually come under the command of the H.L.C. We may have to approach the Andhra Pradesh Govt. for agreeing to feed this area from the H.L.C. It is however to be desirable to inform the present situation to the Andhra Pradesh Govt. and see that to save this standing crop, it may be necessary to release adequate water from the Bhairavani Thippa Reservoir or agree to equivalant quantity of water being Released from the Tungabhadra H.L.C. to feed this area. A Draft letter is also placed below for approval.

PS to Hon PW

279) In the Meeting held in the Chambers of the Minister for Public Works and Power on 11-1-1967, the Minister desired that we may address the Govt. of India in this regards for using their good offices with the Govt. of Andhra Pradesh to achieve an early solution in the matter. Nextly, it was pointed out by the Joint Secretary that we may have to collect particulars regarding the irrigation that was existing under these old Hagari's Channels prior to the construction of the Bhairavanithippa Reservoir and the irrigation that is actually practised after the construction of the Bhairavanithippa Reservoir so as to establish the fact that there has been a reduction in the flows of water due to the construction of the Bhairavanithippa Dam by the Andhra Pradesh. A Draft addressed to the Chief Engr. I.P. with regards to the second aspect is put up for perusal before issue.

WD 01050—GPB—8,00,000 13-12-65

(330) In the recent Inter-State Meeting between the Andhra Pradesh and Mysore Officers, the subject of feeding of Hagari Spring Channels from the Bhairavani Thippa Project was discussed. It was pointed out by the Andhra Pradesh Members that no complaint regarding the shortage of waters below the Bhairavani Thippa Dam under the Spring Channels Ayacut existing in the Andhra Pradesh has been received so far by them. It was therefore observed by them that if there was any difficulty being felt by the Ayacutdars in the Mysore State, it may possibly be due to the silting up of the Channels and lack of proper maintenance by the Ayacutdars of these Channels. It was agreed that this aspect would be examined and the matter taken up for further discussions. A Draft letter addressed to the Chief Engr. to enquire this aspect is placed at placed at Page 287/c.f. for perusal before issue.

6/12/67 6/12/67

394) Kindly see the D.O. letter of the Divisional Commissioner dated the 30th November 1967 at Page 362 C/F. This is in pursuance of the Government letter dated 31-7-67 at Page 311 C/F. In this letter we had intimated the Divisional Commissioner that particulars regarding the area irrigated under the Hagari spring channels prior to and after the construction of Bhiravanti Tippa reservoir had been called for from the Deputy Commissioner, Bellary, and the Chief Engineer and that a decision in the matter will be taken after the receipt of this information. The Deputy Commissioner, Bellary has furnished his report in this regards with his letter dated 27-9-1967 at Page 332 C/F. The Chief Engineer has not yet furnished in report in the matter. He has been reminded in this regards recently. The report of the Deputy Commissioner, Bellary at page 332 may kindly be perused. He has shown that under the six Hagari spring channels in Bellary District in Mysore State, we have according to the 1924 settlement records 830.93 acres of single crop area and 802.99 acres of double crop area. The Deputy Commissioner, has shown however that the aggregate area under these six spring channels was 2436.99 acres. This figure he has arrived at by adding the single crop wet area and twice the double crop wet area. ~~and totalling them up.~~ While furnishing information with regards to the area irrigated under the Daroji Tank, the Deputy Commissioner, Bellary had stated that the single crop wet land would mean land for which water was assured for a period of six months and double crop wet land would mean lands over which water was assured

WD 01050—GPB—8,00,000 13-12-65

for more than six months. Therefore actually the area under irrigation would mean only the area under single crop and under the double crop. It is not clear as to why the Deputy Commissioner has doubled the area under the double wet crop and shown the total aggregate area. ~~Unless the Deputy Commissioner has shown only the double crop area the above workings of the Deputy Commissioner would be incorrect.~~ Nextly it is seen from the statement of

P.335. irrigation particulars furnished under the six channels year-wise from 1952 to 1966 that under the Talmaddi, Rupangundi, Kutanhal and Assundhi, which are receiving water ~~only~~ from the Hagari river the area irrigated has not undergone any appreciable decline except during the year 1964-65 when it may perhaps be due to inadequate inflows in the entire catchment. Otherwise it is seen that under all these channels the area irrigated has not registered any appreciable delcine after the Bhiravani Thippa Dam started operation in 1958 and after it was ~~finally~~ completed in 1962. Further it is also seen that even the registered wet area under Rupangudi and Kuntanhal have not shown any appreciable decline at all. Whereas, however in the case of Talamaddi and Assundhi channels there has been certain reduction with reference to the registered wet area. But since this area was not obtained even prior to the completion of the Bhairavani-thippa reservoir under these channels it cannot be said that there has been any appreciable decline in the irrigation under these two channels. With regards to the areas under the Chagnur and Moka channels it is seen that the area under irrigation under Chagnur channel has been almost constant for the entire period and there has been not much variation. Whereas in the case of Mokha channel there has been a slight reduction in the area during the

Subject: Hagari Spring Channels in Bellary District – Lowering of Drawal – due to Construction of T.B.P. — **File No.** PWD 13 BRA 66 **M. G. S.**

year 1965-66; and in the previous years it has been almost the same. Further, it has been stated by the Deputy Commissioner, Bellary that these two channels are being irrigated from the waters of L.L.C. since 1962-63. There appears to be a slight inaccuracy in this statement of the Deputy Commissioner. The Moka channel is being supplied with water from the L.L.C. for a period much earlier than 1962-63 and it was only in the case of Chaganur channel that water was supplied from L.L.C. from 1962-63. Further, even the areas that are being now irrigated under the Moka and Chagnur channels are much more than what has now been shown by the Deputy Commissioner in his statement. As a matter of fact, Government have approved separately in the case of these two channels supplying of water for an area of about 7000 acres or more. The attention of the Deputy Commissioner, will have to be drawn to this and he may be asked to furnish correct figures with regards to the area irrigated under these two channels and the Chief Engineer will also be reminded for furnishing his report in the matter and the case will be further examined after the receipt of these reports. The Divisional Commissioner, will be informed that certain furtner particulars are being called for from the Deputy Commissioner, Bellary and the matter will be further examined on receipt of that information.

p.t.o.

p. 392 ante

99

Subject: HAGARI SPRING CHANNELS IN BELLARY DISTRICT SHORTAGE OF WATER DUE TO CONSTRUCTION OF BHAIRAVANITHIPPA PROJECT.

File No. PWD 13 BRA 66

M. G. S.

(426) Kupanagudi Village is fed by one of the Hagari Spring Channels. The registered wet Ayacut under this channel is given as 568 acres - 4 Gunṭas and from the statement of area actually irrigated under these channels as received from the Deputy Commissioner, Bellary, it is ↗ p. 376 cy seen that for the period from 1953 to 1966 the area irrigated is more or less equal to the full registered area except during 1964-65. Therefore, it may not be fully justified in our saying that this spring channel has not received adequate waters after the Bhairavanithippa Reservoir was constructed. More over this subject of shortage of water in the Hagari Spring Channels was discussed in the Inter-State Meeting held on 28-4-1967, wherein, it was pointed out by the Andhra Pradesh that the Hagari Spring Channels below the Bhairavani Thippa - Reservoir in their State have not been affected by the construction of the reservoir and that perhaps the shortage of supplies in the Spring Channels is due to non-maintenance ∧ m Tyore of the channels, etc., and it was agreed that the matter would be further examined. The detailed information regarding the area irrigated during the past 10 to 15 years was called for from the Deputy Commissioner, Bellary Dist. and these particulars have been examined and certain further particulars have been called for from him which are still awaited. Kindly see Paras 394 to 399 ante. Under the circumstances, perhaps there may be no point in addressing the Govt. of Andhra Pradesh in this matter now. However, as suggested by the Minister a draft letter is placed at Page 392/c.f. is for approval.

M. G. S.

Receipt No. 1412 from the Govt. of A.P.
Receipt No. 1413 from the Divnal. Commr. Gulbarga.

467) Letter No. 1741-I.1/68-3 dt. 7-5-68 from the Govt. of A.P. ~~is~~ and letter No. REV./2437/188/66-67 dt. 10-5-68 from the Divisional Commr. Gulbarga are placed at pages 405 & 406 of C.F. for perusal. The Govt. of A.P. have stated that they are not obliged to release 10 cusecs of water to safe guard the standing Crops in Rupanguddi Village of Bellary Taluk. This is the reply to this Govt. letter dt. 8-4-68 (P. 393 C.F.). The Divisional Commr. Gulbarga has reminded Govt. and requests that he may be informed about the latest position in the matter of affording relief to the ayacutdars under Hagari Spring Channels. Report from the Dy. Commr. Bellary is still awaited. The D.O. reminder proposed at para 445 ante may please be issued.

451) Release of 10 cusecs of water & that the - finances drawn previously by the AP Govt may not be taken as precedent - to claim the - releases from the Bhairavani thippa project as a right by the Mysore Govt.

For perusal

25/5/68

452) Please peruse paras 426 to 430, and the letter from the Andhra Pradesh placed at page 405 C/F. The stand taken by the Andhra Pradesh that surplus water after meeting the needs of the area under Bhairavanithippa will be let down for the area under the spring channels in Andhra Pradesh area first, is not correct. We will have to tell Andhra Pradesh Government that Bhairavanithippa cannot overlook the needs of the irrigation existing under the spring channels prior to the construction of that reservoir. And therefore the needs of the Hagari spring channels should be first assured and then the waters of Bhairavanithippa proposed for utilisation of new irrigation. And no such demand of waters for the Hagari spring channels is a prescriptive right and cannot be overlooked. A draft is also placed at p 405 C/F for perusal and approval.
